#### SUMMARY

**Ophthalmology** is the branch of medicine which deals with the diseases and surgery of the visual pathways, including the eye, brain and areas surrounding the eye, such as the lachrymal system and eyelids.

Dr Sullivan is a physician who specialises in the medical and surgical care of the eyes and the visual system and in the prevention of eye disease and injury. He provides a full spectrum of care including routine eye exams, diagnosis and medical treatment of eye disorders and diseases, surgery and management of eye problems that are caused by systemic illnesses.
